

C&C Wood Products Ltd.

Sustainable Forestry Management, Fiber Sourcing & Environmental Policy Woodlands Operations

We are committed to responsible stewardship of the forest and the environment throughout our operations. In conducting our business, we are committed to:

- practice sustainable forestry that meet the needs of the present without compromising the ability of future generations to meet their own needs by practicing a land stewardship ethic that integrates reforestation and the managing, nurturing and harvesting of trees for useful products and ecosystem services such as the conservation of soil, air and water quality, biological diversity, wildlife and aquatic habitats and recreation.
- provide for regeneration after harvest and maintain the productive capacity of the forest land base, and to protect and maintain long term forest and soil productivity. Also, to protect forests from economically or environmentally undesirable levels of wildfire, and animals, and other damaging agents and thus maintain and improve long-term forest health and productivity.
- protect water bodies and riparian areas conforming to forestry management practices to protect water quality.
- manage forests in a way that protects and promotes biological diversity, including animal and plant species, wildlife habitats and ecological or natural community systems.
- manage the visual impact of forest operations and to provide the public with recreational activities.
- manage lands that are ecologically, geologically or culturally important in a manner that takes into account their unique qualities.
- use and promote among other forest landowners sustainable forestry practices that are scientifically credible as well as economically, environmentally and socially responsible.
- comply with applicable federal, provincial, and local forestry and related environmental laws, statutes, and regulations.
- support advances in sustainable forest management through forestry research, science and technology.
- improve the practice of sustainable forestry through training and education programs.
- broaden the practice of sustainable forestry on all lands through community involvement, socially responsible practices, and through recognition and respect of Indigenous Peoples' rights and traditional forest-related knowledge.
- broaden the understanding of forest certification to the SFI 2015-2019 Forest Management and Fiber Sourcing Standards by documenting certification audits and making the findings publicly available.
- continually improve the practice of forest management, and to monitor, measure and report performance in achieving the commitment to sustainable forestry.
- avoid procuring wood fiber from illegally logged forests and to avoid sourcing fiber from countries without effective social laws.
